

TaskFlow_PRD_v2.3

Product Requirements Document (PRD)

Product Name: TaskFlow

Version: 2.3

Date: 2025-08-09

Author: Charlie Diaz

1. Purpose

The purpose of this PRD is to outline the functional and non-functional requirements for the TaskFlow platform. This document serves as a guide for the engineering, design, and QA teams to ensure a successful product release.

2. Background

TaskFlow addresses a key market need by providing innovative solutions for fitness. This release focuses on enhancing the core features and improving overall user experience.

3. Features

1. Task Scheduling
2. Real-time Notifications
3. Analytics Dashboard
4. Role-based Access

4. Functional Requirements

- Task Scheduling: The system must allow users to access task scheduling seamlessly with high performance and security.
- Real-time Notifications: The system must allow users to access real-time notifications seamlessly with high performance and security.
- Analytics Dashboard: The system must allow users to access analytics dashboard seamlessly with high performance and security.
- Role-based Access: The system must allow users to access role-based access seamlessly with high performance and security.

5. Non-Functional Requirements

- Performance: Response times should be under 300ms for 95% of requests.
- Security: All data must be encrypted in transit and at rest.
- Scalability: The system should handle a 2x increase in concurrent users over the next year.
- Usability: The product should achieve a SUS (System Usability Scale) score above 80.

6. Milestones

Requirements Finalization – 2025-09-15

Design Completion – 2025-10-01

Development Complete – 2025-12-15

Beta Release – 2026-01-15

General Availability – 2026-02-15

7. Acceptance Criteria

- All functional requirements met and tested.
- No severity 1 or 2 defects outstanding.
- Performance and security benchmarks achieved.
- Stakeholder sign-off obtained.

ShopEase_PRD_v2.1

Product Requirements Document (PRD)

Product Name: ShopEase

Version: 2.1

Date: 2025-08-09

Author: Charlie Diaz

1. Purpose

The purpose of this PRD is to outline the functional and non-functional requirements for the ShopEase platform. This document serves as a guide for the engineering, design, and QA teams to ensure a successful product release.

2. Background

ShopEase addresses a key market need by providing innovative solutions for e-commerce. This release focuses on enhancing the core features and improving overall user experience.

3. Features

1. Product Recommendations
2. One-click Checkout
3. Order Tracking
4. Wishlist Sync

4. Functional Requirements

- Product Recommendations: The system must allow users to access product recommendations seamlessly with high performance and security.
- One-click Checkout: The system must allow users to access one-click checkout seamlessly with high performance and security.
- Order Tracking: The system must allow users to access order tracking seamlessly with high performance and security.
- Wishlist Sync: The system must allow users to access wishlist sync seamlessly with high performance and security.

5. Non-Functional Requirements

- Performance: Response times should be under 300ms for 95% of requests.
- Security: All data must be encrypted in transit and at rest.
- Scalability: The system should handle a 2x increase in concurrent users over the next year.
- Usability: The product should achieve a SUS (System Usability Scale) score above 80.

6. Milestones

Requirements Finalization – 2025-09-15

Design Completion – 2025-10-01

Development Complete – 2025-12-15

Beta Release – 2026-01-15

General Availability – 2026-02-15

7. Acceptance Criteria

- All functional requirements met and tested.
- No severity 1 or 2 defects outstanding.
- Performance and security benchmarks achieved.
- Stakeholder sign-off obtained.

EduPro_PRD_v3.8

Product Requirements Document (PRD)

Product Name: EduPro

Version: 3.8

Date: 2025-08-09

Author: Charlie Diaz

1. Purpose

The purpose of this PRD is to outline the functional and non-functional requirements for the EduPro platform. This document serves as a guide for the engineering, design, and QA teams to ensure a successful product release.

2. Background

EduPro addresses a key market need by providing innovative solutions for e-commerce. This release focuses on enhancing the core features and improving overall user experience.

3. Features

1. Course Builder
2. Live Video Classes
3. Quiz Engine
4. Certificate Generator

4. Functional Requirements

- Course Builder: The system must allow users to access course builder seamlessly with high performance and security.
- Live Video Classes: The system must allow users to access live video classes seamlessly with high performance and security.
- Quiz Engine: The system must allow users to access quiz engine seamlessly with high performance and security.
- Certificate Generator: The system must allow users to access certificate generator seamlessly with high performance and security.

5. Non-Functional Requirements

- Performance: Response times should be under 300ms for 95% of requests.
- Security: All data must be encrypted in transit and at rest.
- Scalability: The system should handle a 2x increase in concurrent users over the next year.
- Usability: The product should achieve a SUS (System Usability Scale) score above 80.

6. Milestones

Requirements Finalization – 2025-09-15

Design Completion – 2025-10-01

Development Complete – 2025-12-15

Beta Release – 2026-01-15

General Availability – 2026-02-15

7. Acceptance Criteria

- All functional requirements met and tested.
- No severity 1 or 2 defects outstanding.
- Performance and security benchmarks achieved.
- Stakeholder sign-off obtained.

MediConnect_PRD_v3.4

Product Requirements Document (PRD)

Product Name: MediConnect

Version: 3.4

Date: 2025-08-09

Author: Alice Johnson

1. Purpose

The purpose of this PRD is to outline the functional and non-functional requirements for the MediConnect platform. This document serves as a guide for the engineering, design, and QA teams to ensure a successful product release.

2. Background

MediConnect addresses a key market need by providing innovative solutions for fitness. This release focuses on enhancing the core features and improving overall user experience.

3. Features

1. Doctor Search
2. Appointment Booking
3. E-prescriptions
4. Health Records Upload

4. Functional Requirements

- Doctor Search: The system must allow users to access doctor search seamlessly with high performance and security.
- Appointment Booking: The system must allow users to access appointment booking seamlessly with high performance and security.
- E-prescriptions: The system must allow users to access e-prescriptions seamlessly with high performance and security.
- Health Records Upload: The system must allow users to access health records upload seamlessly with high performance and security.

5. Non-Functional Requirements

- Performance: Response times should be under 300ms for 95% of requests.
- Security: All data must be encrypted in transit and at rest.
- Scalability: The system should handle a 2x increase in concurrent users over the next year.
- Usability: The product should achieve a SUS (System Usability Scale) score above 80.

6. Milestones

Requirements Finalization – 2025-09-15

Design Completion – 2025-10-01

Development Complete – 2025-12-15

Beta Release – 2026-01-15

General Availability – 2026-02-15

7. Acceptance Criteria

- All functional requirements met and tested.
- No severity 1 or 2 defects outstanding.
- Performance and security benchmarks achieved.
- Stakeholder sign-off obtained.

FitTrack_PRD_v3.2

Product Requirements Document (PRD)

Product Name: FitTrack

Version: 3.2

Date: 2025-08-09

Author: Bob Kumar

1. Purpose

The purpose of this PRD is to outline the functional and non-functional requirements for the FitTrack platform. This document serves as a guide for the engineering, design, and QA teams to ensure a successful product release.

2. Background

FitTrack addresses a key market need by providing innovative solutions for e-commerce. This release focuses on enhancing the core features and improving overall user experience.

3. Features

1. Workout Plans
2. Calorie Tracking
3. Wearable Device Sync
4. Progress Reports

4. Functional Requirements

- Workout Plans: The system must allow users to access workout plans seamlessly with high performance and security.
- Calorie Tracking: The system must allow users to access calorie tracking seamlessly with high performance and security.
- Wearable Device Sync: The system must allow users to access wearable device sync seamlessly with high performance and security.
- Progress Reports: The system must allow users to access progress reports seamlessly with high performance and security.

5. Non-Functional Requirements

- Performance: Response times should be under 300ms for 95% of requests.
- Security: All data must be encrypted in transit and at rest.
- Scalability: The system should handle a 2x increase in concurrent users over the next year.
- Usability: The product should achieve a SUS (System Usability Scale) score above 80.

6. Milestones

Requirements Finalization – 2025-09-15

Design Completion – 2025-10-01

Development Complete – 2025-12-15

Beta Release – 2026-01-15

General Availability – 2026-02-15

7. Acceptance Criteria

- All functional requirements met and tested.
- No severity 1 or 2 defects outstanding.
- Performance and security benchmarks achieved.
- Stakeholder sign-off obtained.
