## PROFESSIONAL SUMMARY

Computer Science and Engineering graduate specialized in Artificial Intelligence, with a strong foundation in machine learning, Python, and AI-driven applications. Published IEEE research author with practical experience in developing web applications using ASP.NET Core and SQL Server. Passionate about building data-driven, efficient software to solve real-world challenges. Eager to apply engineering principles in innovative and impactful projects.

## EDUCATION

Sri Ramakrishna Engineering College, Coimbatore  
B.E. in Computer Science and Engineering  
Specialization in Artificial Intelligence and Machine Learning  
Bright Riders School, Abu Dhabi  
High School

2021-2025

CGPA: 8.77

CGPA: 9

Class of 2021

Percentage: 93.8%

## WORK EXPERIENCE

IT Intern, Cambridge Medical & Rehabilitation Center, Abu Dhabi

2024 June - December

- Developed an ASP.NET web application with SQL Server, enabling real-time monitoring and reducing manual reporting time.
- Designed Power BI dashboards that improved KPI tracking, cutting decision-making time by 30%.
- Optimized database performance, reducing query times from 5s to 1s, enhancing business insights.
- Provided IT support, decreasing system downtime by 20% through proactive troubleshooting.

Robotic Process Automation Intern, Atomino Consulting, Coimbatore

2023 December

- Automated repetitive tasks with UiPath, reducing manual workload by 50%.
- Developed an Automated Mail Reader with UiPath, cutting client response time by 35%.
- Used Python (BeautifulSoup) for web scraping on stock markets and Amazon, supporting business insights.
- Built an OCR-based Invoice Reader using Tesseract, reducing invoice processing errors by 25%.

## SKILLS

**Programming & Development:** Python, C, SQL, MySQL, C#, HTML/CSS

**Web & API Frameworks:** ASP.NET Core, JavaScript, Fast API

**Machine Learning & AI:** TensorFlow, SciKit-Learn, OpenCV, Computer Vision, Transformers

**Data Processing & Analysis:** Pandas, NumPy, Matplotlib, MATLAB

**Cloud & Data Platforms:** Google Cloud Platform, Power BI, Data Visualization, Git

## CERTIFICATIONS

- MATLAB Onramp
- Data Visualization with Power BI (Udemy)
- Edge Computing (NPTEL)
- Intro to AI Powered Automation (UiPath)
- Foundation of Cloud IoT Edge ML (NPTEL)
- Supervised Machine Learning: Regression and Classification (Coursera)
- Google Cloud Skills Boost: Earned multiple badges, including:
  - Prepare Data for ML APIs on Google Cloud
  - Google Cloud Computing Foundations Level 3: GenAI
- Introduction to NoSQL Databases (Coursera)

## PROJECTS

Brain Tumor Detection using CNN

- Python, OpenCV, AlexNet, LeNet
- Achieved 94.76% classification accuracy on MRI brain scans.
- Published in IEEE: 10.1109/ICIRCA57980.2023.10220625.

Resume-Job Match Evaluator \*(In Progress)\*

- Python, FastAPI, HuggingFace MiniLM, scikit-learn
- Semantic matching of resumes with job descriptions using transformer embeddings.
- Explainable AI logic integrated via top-k keyword similarity.
- Backend served as modular FastAPI application.

Digital Watermarking Using Steganographic and Cryptographic Methods

- Python, OpenCV, SVD, DWT
- Embedded secure watermarks in images using steganographic and cryptographic methods.
- Enhanced copyright protection and tamper detection.
